

FIM Rally
Sustainability

Our commitment to a more sustainable FIM Rally

30 trees planted to address CO2 emissions! With the involvement of the CUFAA (Forestry, Environmental and Agribusiness Unit Command).

Meals are served by a local association that ensures the production and distribution of **0-km products** and guarantees the **reduced use of plastic** in favor of compostable material. Food produced and not used will not be wasted! The Pro Loco of Chianciano Terme will take care of **redistribution** to associations in the area.

Mapping of **drinking fountains** for drinking water supply is available.

Containers for separate waste collection are available throughout the area, which is also possible thanks to the collaboration of the municipal administration

Pocket ashtrays are distributed for the disposal of cigarette butts

Washing stations for cleaning motorcycles have been identified

We promote an **active lifestyle**, where sports, culture and sociability meet, through the organization of guided tours to the cities of art in the area

Environmental monitoring will be carried out throughout the event, to assess the real impact on the atmosphere compartment, biodiversity and human health

We support the host territory with the involvement of **local associations** and students engaged as volunteers

Thanks to the contribution of the **Women's Commission**, it is possible to participate in activities and meetings dedicated to promoting **gender equality**

Engage with us!

DON'T WASTE FOOD!

*Buy the right amounts responsibly.
Use the appropriate recycling containers.
Vegan menu options are available!*

DON'T WASTE WATER!

*Check out our list of available drinking fountains near you!
Reuse plastic bottles.
Throw plastic in the appropriate recycling containers.*

HELP US SORT OUR WASTE!

Use the recycling containers: if you can't find them, consult the map for help or ask our stewards in green vests. Don't throw waste oil and other pollutants down non-dedicated drains! Throw cigarette butts in the ashtray we provided in the welcome kit! You can also request them from our stewards with the green vest!

RESPONSIBLE MOTORCYCLING

If you want to wash your motorcycle, use the washing stations you find indicated on the map! When you stop, turn off the engine. We protect the land, respect the animals that inhabit it.

CULTIVATE YOUR WELL-BEING!

Discover scenic beauty, food and wine specialties, cultural and artistic richness of the territory. Take the opportunity to meet bikers and cultures from all over Europe! Use inclusive language and act respectfully.
